PART OF PARAG@N GROUP

MAKE THE **SMARTER** CHOICE

with alternative sustainable product options that help your business contribute to a sustainable economy and planet.

What we buy and where we buy it from has an impact on the world around us - and our planet is being pushed to its limits. We are consuming resources at a rate that is unsustainable, and this is leading to effects such as climate change and pollution.

The good news is we can all play our part to stop this – whether that’s at home or within the workplace.

Within the workplace you will always need office and workplace supplies and it’s convenient to purchase the quick option – but what is the true cost of these goods?

Many businesses are now looking for sustainable options, which include procuring these products from suppliers who share their same sustainable goals and ambitions.

At OT Group, we’re committed to doing business in a way that allows our customers, the communities we work in, our staff, and our planet to thrive. Our approach is simple, our sustainability strategy is built around helping our customers achieve their sustainability goals. **What’s important to our customers, is important to us.**

For more information or to take advantage of our competitive prices, please [contact us](#) today.

THE **SMARTER CHOICE** FOR YOUR BUSINESS

We offer a huge choice of sustainable options for our customers, here is just a small selection...

Providing greener product choices

We offer a wide range of environmental products across our branded and own-label ranges. Our partnership with suppliers such as Wildhearts and our assortment of Fairtrade and social value products means there’s a huge choice of sustainable options on offer.

WildHearts - **Coming Soon!**

Add social value into your supply chain and support your company’s sustainability objectives with our NEW and exclusive WildHearts product range!

By simply switching to WildHearts products, you could help to support social and environmental strategies across the UK and globally, through initiatives focused around education, enterprise, employability, and mental health.

Social value

We’re working with key suppliers that can evidence social value or pass an ethical audit – ensuring we promote this wherever possible.

Supply chain

We continue to assess our supply chain to help meet our sustainability goals, engaging with participants to drive best practice.

Ethical procurement

Through our involvement in the Ethical Trading Initiative, we’ll ensure that our supply chains operate ethically – and work with stakeholders to continue to improve on it.

WE’RE WORKING WITH OUR CUSTOMERS TOWARDS A **MORE SUSTAINABLE FUTURE.**

SMARTPAD

THE ULTIMATE PROCUREMENT PLATFORM.

Our SmartPad procurement platform brings not only a multitude of cost control and efficiency savings to our customers, but also delivers many sustainability benefits for your organisation.

Supply chain consolidation

With hundreds of thousands of products available through a single procurement platform, we can reduce the number of suppliers in your supply chain – providing you with one order, one delivery and one invoice.

SmartChoice products

Our SmartChoice product flag empowers end-users to make a more sustainable choice when ordering their products; by clearly identifying products with environmental, social and sustainable accreditations and benefits.

SmartPrice products

We know how difficult it is for our customers to accurately track what's a fair price to be paying for non-core business items. Our SmartPrice products mean we continually check the market, so you don't have to! As a result, we've rolled back thousands of prices to help you keep better control of your costs, without sacrificing on quality.

Business Guest Checkout

Our latest iteration of SmartPad retains the 'self-serve' functionality for homeworkers we introduced last year, and is designed to provide organisations with complete procurement management – wherever colleagues may now be. With budget control and transparency front-and-centre our Business Guest Checkout allows you to set every employee up as a home user, so they can buy pre-approved products and services from the usual business account, instantly, with minimal admin.

Held orders, saved baskets and subscription options

We help our customers reduce their Scope 3 emissions through innovative technology that enables fewer deliveries.

WORLD-CLASS DISTRIBUTION PARTNERS: MENZIES

Our strategic partnership with Menzies Distribution not only provides a world-class delivery and distribution network, but also a like-minded sustainable partner.

They focus on three main areas to make their business more sustainable and have a clear roadmap to Net Zero:

- Fleet
- Energy consumption
- Reuse & recycling for themselves and their partners.

With innovations that span fleet electrification, vehicle to grid charging, vehicle design, alternative fuels, self-sufficient warehousing, carbon offsetting and revisiting the need for PVC in vehicle livery, they are committed to shaping logistics for the future that directly address the climate change crisis.

A BETTER FLEET TODAY MAKES A BRIGHTER TOMORROW.

300,000 miles are driven by Menzies fleet every day. So making sure it's done in a way that's best for the planet makes a material difference.

The future's electric

Menzies introduced their dedicated electric fleet because they know that fossil fuels aren't sustainable. It's their priority to expand it at pace – far ahead of regulatory deadlines.

For every electric vehicle introduced, we're improving air quality, cutting particulates and reducing harmful nitric oxide emissions. To enable this fleet to make as many carbon neutral deliveries as possible, Menzies have established a large commercial charging infrastructure in the UK. Through extensive trials, they've found the most energy efficient vehicle-to-grid charging process – meaning they charge at off-peak times and return spare charge to the grid at peak times when energy is in high-demand.

Menzies impact through choosing electric

- Over 260,000 emission free miles driven every year
- 10 million items delivered emissions free in 2019
- 2.5m kg of CO2 saved by replacing diesel with electric
- PVC-free livery – biodegradable and free from toxic chemicals
- Zero-emission rural deliveries including the Scottish Highlands & Islands

2.3m kg

WORKING TOWARD CARBON NET ZERO.

OT Group are committed to supporting our clients' ambitions and the UK Government targets to achieve Carbon Net Zero by 2050.

We have engaged with external consultants to help define a Carbon Net Zero strategy for our combined OT Group business in line with our parent company Paragon Group's Carbon Net Zero Framework. This vital project will determine how Net Zero will be achieved through governance enhancements, resource efficiency measures and behavioural shifts, both within the business and through working closely with our supply chain.

The scope of work currently being undertaken is:

A desk-based corporate governance review, including the current 14001 EMS framework.

Undertaking a site energy and environmental audit at key locations.

Determining a science-based targets (SBT) and trajectory.

Establishing a forward-looking Net Zero Action Plan.

Establishing a greenhouse gas (GHG) emissions baseline and inventory.

Advising on an effective data collection and reporting process.

Developing an outline Net Zero Strategy, including environmental aspects and impacts.
